

Diversity

Show the class a brown egg and a white egg. Talk about the similarities and differences between the two. The only big difference being color.

Without showing the class, break the two eggs, and bring them back out for the kids to see and ask them if they could tell which yolk was from the brown and which was from the white.

Of course, NO ONE can tell! Discuss how eggs are like people. Everybody is really alike and the only thing that was different was the color of our skin. We all have the same feelings.
