[Rainbow lettering only](#)

How to make rainbow: Use red, orange, yellow, green, light blue, dark blue and purple construction paper to make paper chains. (You can also have students help you with this.)

Use 1 ½ inch wide strips that are approximately 6 inches long. Glue the ends with a half inch overlap so each ring is about the same size, connecting the rings as you go. Make a chain of each of the seven colors of your rainbow. (You can use any colors that you choose and make it as wide as you like). Choose a background for your bulletin board and fasten the pieces to the bulletin board. Add a boarder if you would like.
